Healthcare

Connected Health

Selected Existing and Upcoming Research
The healthcare industry is undergoing rapid change, dynamic discoveries and pressures driving business decisions and corporate growth. Business models are being forced to evolve as healthcare continues to shift from a treatment focus to points of wellness, prediction, personalization, and prevention. Additionally, mobility in healthcare and the exchange of health information has disrupted the status quo, and dramatically altered how providers and patients interact, how medicine is practiced, and how care is delivered.

Frost & Sullivan’s links all major areas in healthcare that support the delivery of healthcare ranging from drug discovery to medical technology and connected health, right to hospitals, primary care and patients. Our solutions focus on medical products and solutions that further innovation and enable transformation of healthcare delivery.
Frost & Sullivan Connected Health Program

The Frost & Sullivan perspective on Connected Health helps you better understand buyer-seller dynamics as the healthcare system transitions to digital information. Our research and insights help you make informed strategic decisions around how best to navigate this complex market. We can support needs from syndicated research to projects ranging from proprietary strategic engagements and market research, marketing solutions, and whitepapers, all leveraging the global reach of our firm to propel your business forward.

A highly dynamic, converging and evolving landscape
