Management

“Common Language” for
Lab & Analytical Devices

OPC-UA LADS

LADS Use Cases

Application-centric, value-based prioritization of epics & use cases

- Remote Monitoring, Alarms & Notifications
- Remote Control
- Program Management & Orchestration
- Results Management
- Preventive & Predictive Maintenance
- Device & Fleet Management

Lab & Analytical
Devices

Mastering Interoperability

Design Challenges

- Heterogeneity
- Future-proofing

Device Type Agnostic Modeling

- Generic modeling enables plug & play interoperability
⇒ **Horizontal** broad integration

Meta-Data & Semantic Contextualization

- Semantic augmentation enables efficiency gains through machine based “understanding & processing”
⇒ **Vertical** deep understanding

LADS - Why OPC-UA ?

Booth: B2.237

Because OPC-UA is ..

- Secure
- Proven
- Platform independent
- Information modeling
- True & Open standard
- Growing Cloud support
- Provides building blocks

this is a must have

process industry, pharma, ..

from embedded micro-controller to cloud

key for plug & play

speaks for itself

required in the laboratory- & analytical domain

like asset management, referencing external semantic definitions ..

Device Type Agnostic Modeling

- My Hettich Centrifuge

LADS – OPC-UA Joint Workgroup Setup

Exchange
with foundations in the Lab
& Analytical domain

Harmonization
throughout OPCF
workgroups avoids
redundancy, fosters
synergies, compatibility &
reuse
